Subject: Nuclear repository a bad idea

To whom it may concern,

- 1 I am disturbed by your plans to bury nuclear waste in the great Yucca Mountain. I honestly don't think this is a wise decision. Though you may not see any predictable adverse effects of this action I feel confident that it it will come back to haunt us or our children. Please rethink your actions! Perhaps you could check into a
- 2 recycling process that independent engineers have come up with somewhere in New Mexico or Arizona. I will get more information on that to send you. Though their work has been repressed for financial reasons, I think it time that we begin looking at the environment over the economy, especially in nuclear issues. Please don't do anything my children will regret
